Register for MasteringPhysics™

Step 1: Do you have an access code?

A student access code is a printed code supplied inside the MasteringPhysics Student Access Kit (and sometimes by other means.) If your instructor requires you to use MasteringPhysics, a student access kit may have been included with the purchase of your new textbook.

Yes, I have an access code. **No**, I need to purchase access online now.

Example

SIMPLE-FRILL-TONLE-WEIRS-CHOIR-FLEES

your access code may look like this

Continue »

Click **“Continue”**

If you selected “No, I need to purchase access online now,” then mouse over the book covers and click on your text.

Welcome, Christy Lawrence Log Out Home Constants Periodic Table

Return to Introduction to MasteringPhysics Previous 1 of 1

Welcome! Christy Lawrence

Learning Goal: To practice using this program and its helpful features.

This program presents homework items assigned by your instructor and *works with you* to answer them. Homework items typically have an introduction, possibly figures, and one or more parts for you to answer.

Part A Part B

PEARSON

Type of help offered

- The program tells you immediately whether or not your answers are correct. Usually, you will have multiple chances to get the correct answer. Your instructor will determine how many tries you get.
- In many problems, hints are available to help you when you get stuck. If you don't need the hints to solve the problem, you can still use them for review later on.
- If you submit an incorrect answer, the program often responds with specific, helpful feedback.
- The program is forgiving of many typos and formatting mistakes. If it can't figure out what you entered, it will let you know and give you another chance.

These exercises were chosen specifically to lead you through the key features of the program and are not intended to test your knowledge of any specific subject material. Therefore, on this problem you will not be penalized for using hints and submitting incorrect answers. In fact, you should submit incorrect answers to use the hints to see what happens!

Part A

How many squares are in this 2×2 grid (Part A figure)? Note that the figure link lets you know that a figure goes along with this part. This figure is available to the left.

Enter your answer as a number in the box below and then submit your answer by clicking **submit**

Number of squares =

submit my answers give up review part

Grading

See the help file available by clicking the **help** tab in the top right corner, if you want to know more about grading works. Here is the most important information you'll need:
